TraxView Requirements:

Terminal Server

A Terminal Server is required if you will be using TraxView in a wireless or remote environment. All printers accessible through the Terminal Server must have their drivers added as local printers on the Terminal Server.

AgTrax recommends 1 Terminal Server per up to 50 concurrent users (depending on amount of RAM and CPU's). Please refer to the appropriate manufacturer's website for their specific hardware requirements. The requirements listed below are for AgTrax software applications only and do not include the Operating System or other application requirements.

Recommended

Processor:	Intel Dual Core Xeon 2.5GHz or Higher
Memory:	8 GB
System Drive:	120 GB
Network Card:	1 GB
Optical Drive (CD/DVD)	DVD-ROM
Operating System	Windows 2008 R2 64bit

**** Add additional RAM above 25 users for a recommended maximum of 50 users.**

Workstations:

AgTrax has developed the following requirements for your workstation(s). A workstation can be a desktop, netbook, laptop, or tablet PC. Please be sure to adhere to AgTrax supported operating systems and specifications.

Recommended

Processor:	Intel Core 2 Duo 2.93 GHz or Higher
Memory:	4 GB
Network Card:	100 MB
Optical Drive (CD/DVD)	DVD-ROM
Operating System	Windows 7 Professional Windows XP Professional

**** Home versions of operating system are not acceptable and not supported.**
